# GET THE LATEST LOOK

## A FRESH TAKE ON INDUSTRIAL STYLE

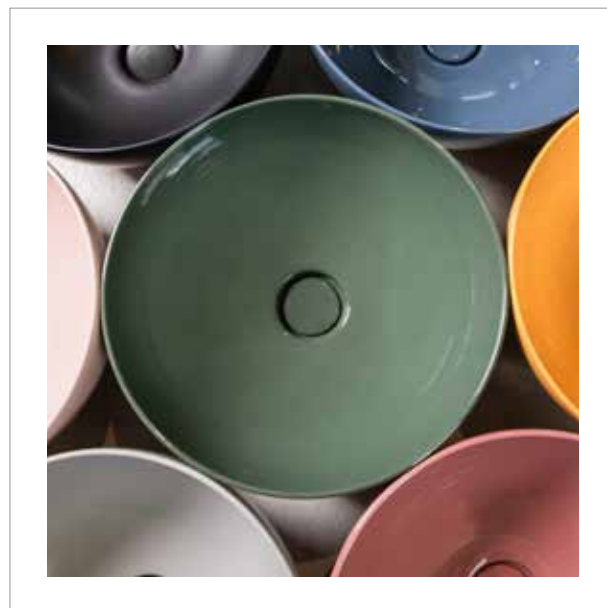

Industrial design is a trend that has remained strong over recent years, steadily evolving with hints of modern concepts. The finished look satisfies both utilitarian and commercial purposes.

Our Revolution collection reflects the same concept, beautifully tying together modern and elegantly organic aesthetics. The brassware comes in multiple favourable options including the popular Matt Black finish whilst drawing inspiration from the Industrial Revolution with unique cog-like mixer handles and luxurious knurling details. Such statement design is enough to add character to even the most minimalistic basin areas.

## THE POWER OF COLOUR

In line with this year's more optimistic outlook, colour is back. Offering up a cheerful palette that ranges from matt pink, thistle blue, fern green, dusky pink to buttercup yellow and terracotta tones, the options for a brighter, bolder bathroom are endless.

Elevate your aesthetic with a coloured washbasin and tiles set in vibrant tones against an otherwise neutral palette for a fresh take on Scandi style, or layer up a rainbow of hues and textures for a candy-bright space with retro-inspired appeal. Colour-blocking offers another impactful way to introduce colour, from solid swatches of your favourite shade against a black or white base or by layering contrasting colours for a mood-boosting pop to brighten up your day.

## SPA SANCTUARY

In the bathroom, calm and serene reigns supreme with rejuvenating spa spaces designed to rebalance the mind, body and soul.

Luxury finishes combine with advanced customisation to deliver an outstanding bespoke experience. Experience the soothing power of the natural world indoors with modular waterfall, rain, mist, and cascade shower solutions, while feeling uplifted by additional body sprays, RGB lights and more.

## TRENDY TERRAZZO

Move over Marble, there's another versatile material having a moment of its own. Terrazzo has been in the design spotlight for some time now, but with new concepts and styles introduced this year, the trend is here to stay! Go bold with multiple terrazzo options available in slab formats, basins, tabletops, and shelves that pair well with the minimalistic brilliance of the chic Bristol bathroom collection.

## SOPHISTICATED SOFT BRONZE

Step aside Chrome, Soft Bronze is here to take the spotlight as the new kid on the block.

As the cocooning trend increasingly takes hold, the warmth of Soft Bronze introduces a more welcoming luxurious feel that perfectly captures the current mood. Renewed appreciation for our home comforts continues to build with quality finishes that introduce an air of hotel-chic elegance.

High-quality brassware in a luxurious finish is an ideal way to channel the trend. BAGNODESIGN's exclusive Soft Bronze finish has been added to our design-led collections including the brand-new Bristol and Orology product lines. The modern designs work as the perfect templates to highlight the industrial beauty of this unique finish and achieve a balanced look of brilliance.

## FABULOUS FUNCTIONAL FURNITURE

As interior design becomes more customised and experimental, unique furniture shines as the statement feature in bathroom spaces.

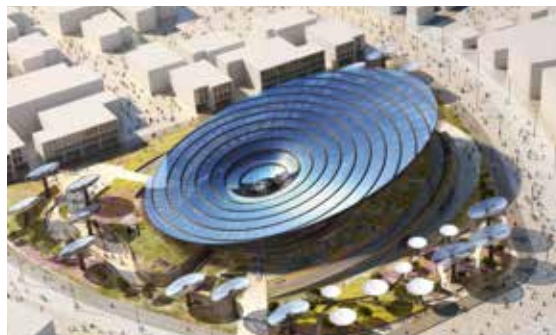

Orology is one among many collections offering furnishing and accessories to match. Explore items from mirrored wall shelves and porcelain slab countertops to double drawer vanity units with fluted detailing for a moody interior.

Multiple finish options allow you to enhance your personal style. Complete an elegantly themed space with storage furniture and exude aesthetic functionality.

THERMOSTATIC MIXERS

THERMOSTATIC SHOWER MIXERS -  
*An enjoyable, reliable and safe showering experience*

BAGNODESIGN's thermostatic mixer valves regulate water temperatures to provide you and your family a safe and enjoyable showering experience. With predetermined settings, these mixers combine hot and cold water to maintain a consistent temperature and avoid scalding.

If for any reason your cold-water supply stops, the thermostatic mixer automatically shuts down, thus ensuring a reliable, convenient, and safe showering experience.

**Push-Button Activated**

Operating our thermostatic mixers is simple and intuitive – On and Off! With a push of a button or twist of a knob, you can instantly adjust your water temperature to suit your comfort.

**Default Flow Rate**

The flow rate is set by default and therefore eliminates the need to make any additional adjustments.

**Product Installation & Maintenance Are Simplified**

Our thermostatic mixers are all supplied with the new 'Easy Install' installation box which offers:

- Solid wall or dry wall installations.
- Sealed installation box.
- Easy cleaning and maintenance without having to remove valve, which is pre-installed into box.
- Colour coded water entry points.
- Min-Max installation depth markings.

## BAGNOSPA - STEAM

Full area achieved by wedi®

SPA &  
WELLNESS

100% internally waterproof, wedi® boards are the ideal base for plastering and tiling works. As they can be applied to practically any substrate, wedi® offers a quick, simple method of construction for new build or renovations in commercial or residential sectors.

The boards replace the need to build timely stud walls and substitute plasterboard needs for shower areas, concealing cisterns or preparing walls. They are waterproof, insulating, versatile, light and robust. Despite their size and durability, the lightweight boards can easily be cut on-site, for easy assembly and a near silent renovation – being directly tileable also speeds up installation time for projects.

Modular forms such as shower trays, seats & benches and recess niches can also be tiled directly and provide built in comfort and functionality – whilst adding sleek design aesthetics. Functional and safe, a wedi® system efficiently builds a waterproof, bespoke bathroom.

The various marbles used have been chosen for their strong concentration of fossils and as they are a purely natural product, there will always be the presence of different variations of veins, colours and shades, as well as micro-cracks and small holes. This gives each piece the characteristic of being truly unique.

Basins on this page do not have tap holes.

# WASHROOM

AQUAECO'S washroom solutions are designed for the washrooms of the future.

Washroom design today not only incorporates durability and quality, but it must also consider its carbon footprint. Our portfolio of comprehensive washroom solutions incorporates eco-friendly features that help decrease water and energy consumption. Touchless mixers, hand dryers, soap dispensers, WC and urinal flushes, paper towel dispensers, all help to reduce wastage and save costs. Touch-free washroom fixtures also vastly improve overall hygiene.

Our washroom solutions meet the highest standards of durability and quality while staying true to our promise of finely crafted designs. Our latest EX316 collection is manufactured with 316 tough-grade stainless steel, known for its better resistance to corrosion and therefore ideal for high-traffic washrooms.

## ANTI-SCALD DEVICE

The AQUAECO anti-scald device will maintain a safe temperature of hot water for appliances, a must for young children, the elderly and those requiring care.

By installing this device, the risk of scalding will greatly be reduced due to the automatic temperature detection, ensuring that when the water becomes too hot, the flow of water will stop.

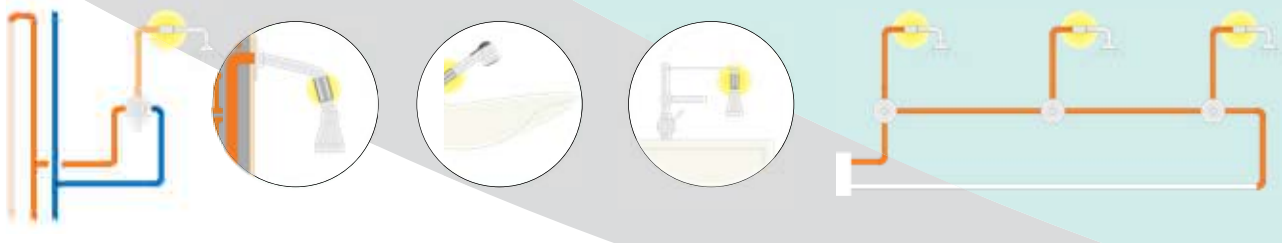

After reaching a safe temperature the device will re-activate.

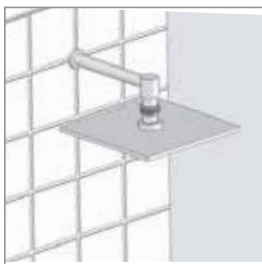

- Thermostatic temperature detector.
- Chrome brass body.
- Water flow is blocked if temperature goes above 48°C.
- Self reactivation when the temperature decreases.

### APPLICATIONS:

In Home Showers, Kitchen Mixers, Hospitals etc.

## PRESSURE LIMITER APPLICATIONS

### Shower heads/handles

- Protection against excess pressure load due to clogged nozzles or high line pressure

### Bidet Sprays

- Protection against overpressure and water hammer
- May ease operation

HONEYCOMB Clinic Aerators

- The integrated flow limiter (Flow Class Z) ensures a constant water flow: 7.5-9 l/min @ 3 bar. This type of flow restriction makes a significant contribution to preventing unnecessary contamination as a result of water spray
- laminar stream
- only drinking water compliant materials used, as certified according to KTW (UBA), DVGW 270, etc.
- improved safety and hygiene thanks to an effective four-colour concept – each colour symbolises a replacement cycle. This means it is easy to recognise and monitor whether replacement is taking place regularly and correctly
- minimal spray and aerosol formation, therefore minimised risk of infection with waterborne legionella or pseudomonas bacteria

FOUR COLORS, MORE SAFETY

- More safety and hygiene thanks to an effective four colour- concept; every colour represents an exchange cycle which makes it easy to recognise and monitor whether the replacement has taken place as scheduled.
- The exchange cycle needs to be set by the facility itself since the water and operating conditions have a huge effect on the microbiological potential contamination of the aerator.

## FLUSHING SOLUTIONS

- **More Space:** Since concealed cisterns are built into the wall, they free up a considerable amount of bathroom space that would otherwise have been taken up by the cistern.
- **State-of-the-art technology and durability:** The AQUAECO range of concealed cisterns boasts high-tech working parts to ensure trouble-free operation.
- **Design freedom:** Homeowners and designers can pair their choice of actuator or flush plate and wall-hung or floor-standing toilet pan to perfectly complement their bathroom's particular style and design.
- **Easy to clean and hygienic:** Concealed cisterns and wall-hung WC pans provide the ideal easy-to-clean and optimum hygiene solution – no obstacles to clean around or cisterns to clean under.
- **Good for the environment:** All AQUAECO cisterns contain a dual-flush mechanism, helping to reduce running costs by saving water – using as little as two litres of water for a half flush.
- **Noise reduction:** Since the cistern is built into the wall, any noise created by the process of flushing is significantly reduced, making this an ideal solution for en-suite bathrooms. This is also a key in any hospitality requirement.
- **Strength:** All AQUAECO cistern frames are designed and built to support up to 400 kg in weight.
- **Warranty:** All AQUAECO cisterns come with an impressive 10 year warranty.
